Kaleidoscopes, Hubcaps, and Mirrors

## Engineer's Sketch

Take the old cable bridge down. Lay the old bridge on the ground from point *C* to point *D* so that points *B*, *C*, and *D* lie in a straight line.

Place a stake at point *A* directly across the river from point *B*.

Place another stake at point *E* so that points *A*, *C*, and *E* lie in a straight line.
