**Purpose and Goals - Rr 20/20 Vision Committee and Building Subcommittees**

- Engage Stakeholders
- Collaboration
- Communication
- Share Parents/Guardians Survey Summary
- What do we need to do to safely open RRCSD?
- Gain approval of recommendations/plans from the Cuyahoga County Board of Health and RRCSD Board of Education to implement when students/staff are permitted to return to RRCSD.

**Building Subcommittees/Chair(s):**

- Beach/Goldwood (Tara Zbin, Dr. Carol Rosiak)
- Kensington (Todd Murphy, Heath Horton)
- RRMS (Megan Rose, Jeff Schultz)
- RRHS (Rob Winton, Brian Gergerly)
- RRCSD Activities and Athletics (Mark Wagner)

## **Healthcare updates**

Dr. Lynne Eversman shared:

- Increased positive case rates with children.
- 18-24 year olds are seeing an increase in surge of positive rates.
- 80% of deaths are those over 65 years of age.
- UK variant - 76% of those released from hospital have lingering issues from COVID19.
- COVID lung issues are much worse than heavy smokers.
- Health care workers are seeing 5 months of protection after infection.
- New mutations in UK and South Africa are more contagious.
- Pulse oximeter show decrease in oxygenation before symptoms appear.
- Treatments:
  - Monoclonal treatments are very effective for high risk patients.
  - Regenerome is very effective for high risk patients at advanced age.
- Up to 30% of people with COVID are asymptomatic.
- Tests:
  - PCR and nasal swab are very good indicators.
  - Saliva test is not as effective.
  - Governor DeWine is ordering at home testing.
- Vaccines (Pfizer and Moderna):
  - Patients rarely have significant side effects.
  - Those who have had severe anaphylaxis should wait to receive vaccine.
  - 1-2 weeks after receiving 1<sup>st</sup> shot, patients receive partial immunity.
  - Those who contracted COVID after the first shot and were treated with Regenerome should hold off on the 2<sup>nd</sup> shot.
  - May have fevers/chills and side effects 12-24 hours after vaccine.
- We will only achieve herd immunity after 70-80% of population has been vaccinated.

## **RRCS Updates**

Dr. Shoaf shared:

- The Rr 20/20 Vision committee will no longer meet unless the need arises.
- Implementing green model Tuesday, January 26, 2021.
- Information has been submitted to the State in order for RRCSD to receive the vaccine; 90% of staff indicated willingness to get the vaccine.
- CDC Key Mitigation Strategies
  - Consistent/correct use of masks
  - Social distancing to the largest extent possible
  - Hand hygiene & respirator etiquette
  - Cleaning & disinfection
  - Contact tracing in collaboration with CCBH

## **Breakout groups to discuss:**

Advantages, disadvantages, experiences and input regarding:

1. Green, yellow and red instructional models
2. Implementing the green instructional model – January 26, 2021
3. RRCSD COVID-19 Safety Protocols

Dr. Shoaf's group shared:

- Students are very much looking forward to the green model for tomorrow and the need for some sense of normalcy.

Ms. Anderson's group shared:

- Importance of continuing to remind students/staff to self-evaluate.
- What are the plans to heal the anger within the district.

Mr. Gifford's group shared:

- Mr. Gifford provided an update regarding HVAC at KIS; air filtration and UV sanitization throughout the district.

Dr. Shoaf shared that the committee has no further plans to meet unless extenuating circumstances necessitate the need.
